

BUILDING SOLUTIONS FOR BUILDING SOCIETIES

Building Societies are essential, especially now the high street banks retreat from towns and rural areas.

We help Building Societies extend their geographic coverage with efficient new models that acquire new clients. Simultaneously we see the need to combine the trusted passbook with card services and e-wallets.

Retail-BCG can assist in this development by providing:

CARD ISSUING

We have the ability to help the Societies issue cards to their savings account holders, we manage the risk and compliance for the society easing the process.

BRANCH AUTOMATION

We have the ability to automate some of the branch services to free up staff to undertake more advisory and sales roles enhancing customer loyalty.

AUTOMATED SERVICES

Automated services in new locations allow the Building Society to capture new clients and grow.
